University of Surrey Enflow
LS13

Equipment

LDA
1,2,3 component, Dantec fibre-optic systems

PIV
Tomographic PIV system (5.5 Mpixel sCMOS cameras) - LaVision
- Planar PIV system - TSI

FFID
4 channels fast flame ionization detector system (concentration measurement) - Cambustion

HWA
Multi-channel Dantec HWA systems

Pressure
Purpose-built multi-channel pressure scanners

Others
Miniature seven-hole probes
Cold-wire anemometer for temperature measurement
Thermistor etc.
Capability for momentum, heat and mass flux measurement

Surrey Sensors
www.surreysensors.com
Novel devices made to order.
